

OUR MISSION STATEMENT

AgroCycle partners' and contributors' scientific research has been used to create resources so that you too, can be part of the conversation about making waste work.

Guiding AgroCycle Kids are the United Nations Sustainable Development Goals.

Reimagine educational experiences through play and exploration, using nature as our guide.

Only a healthy, loving relationship with the natural world and a respect for the environment belongs here.

Create, learn and engage in sustainable development projects and inspire participants to embed the concept of sustainability within the school system, academia, industry and greater society.

You will envision a world where individuals, governments, companies, corporations, educational institutions, and other organisations operate sustainably, accept we are all interconnected and work together for the sake of Mother Earth.

Calling all AgroCycle Kids to actively promote environmental stewardship through the use of our educational resources, planning and practices built on an unshakeable foundation of LOVE for the planet.

Love that AgroCycle Kids are global citizens working collectively to tackle climate change.

Eco Feminist Froebelian Philosophy guides AgroCycle Kids.
